Incoming Delivery Dashboard

'Incoming Delivery Dashboard' is a very useful app designed to find and manage easily incoming deliveries.
In fact, this App allows you to group all your Documents'lines in a single page, filter them and keep an eye on expired Purchase Orders with Outstanding Quantities greater than zero.

First of all, look for 'Incoming Delivery Dashboard' in the menu

Tell me what you want to do

Incoming Delivery Dashboard

Go to Pages and Tasks

> Incoming Delivery Dashboard   Tasks

Check easily the 'Expected Receipt Date' thanks to the different colors of 'Document No.'

Setup

For lines with 'Outstanding quantities' greater than zero, 'Document No.' color depends on the **'Expected Receipt Date'**:

- Red: when this date is before the Work Date;
- Yellow: when this date is after the Work Date but before the 'Warning Date';
- Green: when the 'Warning Date' is after or corresponds exactly to the Work Date.

With this Setup, you can choose your 'Warning Date'.
Set here 'Warning Range Days'.
In particular, it will be:

**'Warning Date' =
'Expected Receipt Date' - 'Warning Range Days'**

So, here you set how many days before that the 'Expected Receipt Date' expires you want to be warned with Yellow color.
